

	Environment Management System	MOD01 Pag. 1
	MOD01-Environment Policy	Rev. 2 del 10/07/2008

The **FGS DRILL S.r.l.** Business Management has planned its environment policy aims as follows :

1 Law Observance

we activate production processes which comply with the current laws and regulations and don't use substances dangerous for the environment

2 Continuous improvement and pollution prevention

we improve gradually and steadily our environmental performances using appropriate and economically practicable technologies aiming at reducing the environmental impact of our production processes and preventing pollution

3 Recycling and regeneration

we get rid properly of waste materials resulting from our production processes, preferring procedures for recycling and regeneration

4 Commitment for the environment

we manage a structure, integrated in the company organization, in order to plan and monitor our environmental performances, enacting well-planned schedules and achieving important goals

5 Staff involvement and healthcare in work places

we make sure that our employees and suppliers are aware of the importance for environment protection of their compliance with the regulations provided for by the operation procedures

6 Enviroment communication

we promote and make visible our commitment for the environment

7 Reduction of the environmental impact in the production processes

we plan and enact strategies aiming at reducing both the consumption of raw materials and sources of energy and the overall environmental impact due to our production processes, considering the environmental requirements and following the evolution of the clean technologies
